**Subject:** Re: Northrop Grumman and Navy jointly submitted Comprehensive Sampling Program

Lora/Ed,

This E-mail follows my discussion with Ed Hannon regarding the Northrop Grumman and the Navy jointly submitted Comprehensive Sampling program. Northrop Grumman has agreed to add CR/Cd for total metals testing to monitoring well 15-I. This sampling program has been submitted pursuant to a request by the lead and involved regulatory agencies (NYSDEC and USEPA) to do a comprehensive sampling of the Grumman and Navy OU2 and OU3 groundwater program. By this email, the NYSDEC hereby approves this plan, originally submitted on February 15th, 2013. Grumman and/ or the Navy will submit the finalized plan for the NYSDEC records.

The NYSDEC looks forward to reviewing the data generated by this massive sampling program. Please call me direct if you have any questions.

Thanks,  
Steve Scharf

Jim / John

On 2/15/13, Northrop Grumman and the Navy jointly submitted a Comprehensive Sampling Plan for NYSDEC review and approval, which provides for the comprehensive round of groundwater sampling requested by the USEPA and NYSDEC during our 11/29/12 meeting in Manhattan.

Sampling is currently underway in accordance with the submitted plan and should be completed by July. We understand from previous discussions with you that the sampling plan was accepted. Accordingly, we would appreciate receiving written acknowledgement of NYSDEC's approval of the sampling plan.

Please let me know if you have any questions or require any additional information.

Thank You,  
Edward Hannon
